

# FCL-100 Series

*High performance,  
Easy viewing, Compact unit !*

**Shinho**

## FCL-130 type

FCL-130			FCL-130 (W318 x D74 x H65,mm)
Temperature alarm	0		Temperature alarm
Control output	0		Relay contact output
	1		Non-invert. analog output
	2		Current output [mA] 20mA DC
Input	0		Temperature input, or Thermocouple K type only (Input range needs to be designated.)
Output	0C		Terminal cover
	0M		Open plug
Range designation	Cm 100°C		
	C.Cm 100°C		Needs to be designated when using Thermocouple K type only.
	Cm -50°C		(Range is designated by any option.)
	C.Cm -50°C		

- FCL-130 type has no temperature alarm output (temperature alarm action)
- FCL-130 type has two kinds of input: Thermocouple multi "input" and Thermocouple K only "input". In the case using Thermocouple K only "input", the range must be designated when ordering.
- There are only 2 options that can be added to FCL-130 type: Terminal cover [0C] and Cover Block [0M].
- When ordering, select the 2 character code from the table above for (including code, unnecessary) besides entering the fixed scale (Thermocouple K only) by using a "comma".

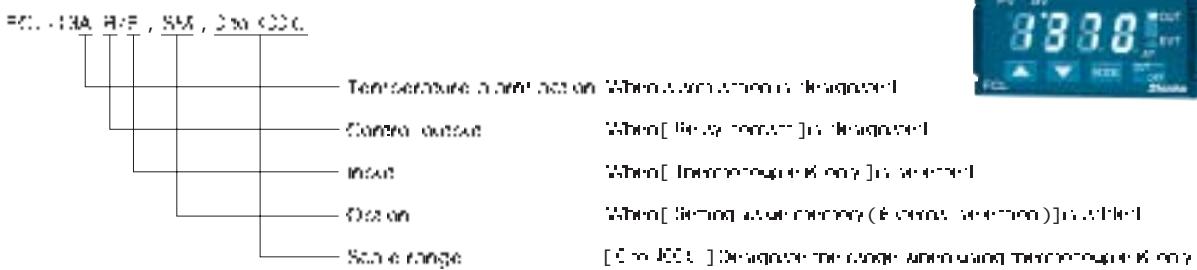

## FCL-13A type

FCL-13A			FCL-13A (W318 x D74 x H65,mm)
Temperature alarm	0		Temperature alarm function (Temperature input selection by any option.)
Control output	0		Relay contact
	1		Non-invert. analog output
	2		Current output [mA] 20mA DC
Input	0		Main range
	1		Thermocouple K type only
Output	Cm		Relay communication [0C]
	0V(0A)		Relay current 0A
	0V(1A)		Relay current 1A
	0V(2A)		Relay current 2A
	0V(5A)		Relay current 5A
	0V		Setting value memory (External selection)
	0C		Terminal cover
	0M		Open plug
Range designation	Cm 100°C		
	C.Cm 100°C		Needs to be designated when using Thermocouple K type only.
	Cm -50°C		(Range is designated by any option.)
	C.Cm -50°C		

- FCL-13A type has two kinds of input: "Main range" and "Thermocouple K only", the other, the range must be designated when ordering.
- Select communication [0C], Relay output 0A [0A], and Setting value memory (External selection) [SM], they cannot be added simultaneously (Only 1 of them can be added.)
- In the case of Thermocouple K only input, range designation is needed when ordering.
- When ordering, select the 2 character code from the table above for (including code, unnecessary) besides entering the fixed scale (Thermocouple K only) by using a "comma".

### Example: When ordering

### Rated scale

In the case of multirange input

Output type		Range	
Thermocouple	K	Cm 100°C	Cm -50°C
	-	Cm 100°C	Cm -100°C
	E	Cm 100°C	Cm -100°C
	N	Cm 100°C	Cm -200°C
	R, T	Cm 100°C	Cm -200°C
RTD	R*100	200 mΩ - 999 mΩ	300 mΩ - 999 mΩ
	R*100	100.0 mΩ - 999.9 mΩ	100.0 mΩ - 999.9 mΩ
	R*100	200 mΩ - 999 mΩ	300 mΩ - 999 mΩ
	R*100	100.0 mΩ - 999.9 mΩ	100.0 mΩ - 999.9 mΩ

In the case of Thermocouple multirange input

Output type		Range	
Thermocouple	K	Cm 100°C	Cm -50°C
	-	Cm 100°C	Cm -100°C
	E	Cm 100°C	Cm -100°C
	N	Cm 100°C	Cm -200°C
	R, T	Cm 100°C	Cm -200°C

In the case of Thermocouple K only

Output type		Range	
Thermocouple	K	Cm 100°C	Cm -50°C

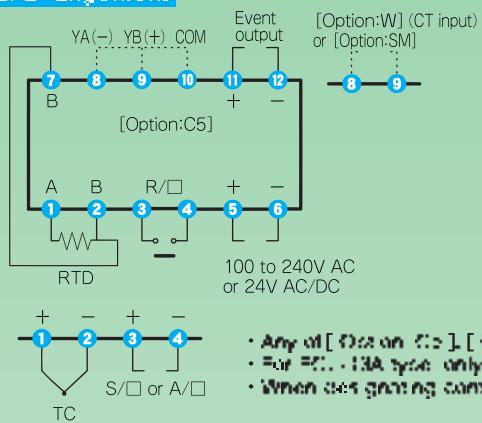

## Specification

Category	Parameter	Test Condition	Value
Power	Power consumption	50°C x 40°C min	10W (Without heating function)
Power	Input	• Input voltage: 9V...12V DC, Input resistance: 100Ω or less • Power supply system (Resistance per zone: 1Ω or less)	• Input voltage: 9V...12V DC, Input resistance: 100Ω or less • Input voltage: 9V...12V DC, Input resistance: 1Ω or less • Input voltage: 9V...12V DC, Input resistance: 1Ω or less
Accuracy (After calibration)	Input voltage	Within 1% of the value of 12V (±1%) without heating function	Within 1% of the value of 12V (±1%) without heating function
Power consumption (heat)	Cold start time	0.75 seconds	0.75 seconds
Communication	P.D.(Without heating function)	Communication of power source or C.C. communication of heat source	Communication of power source or C.C. communication of heat source
Communication	Proportional band(%)	From 100% (70% minimum value)	From 100% (70% minimum value)
Communication	Demand limit(%)	From 100% (70% minimum value)	From 100% (70% minimum value)
Communication	Proportional band(%)	From 100% (70% minimum value for DDC output)	From 100% (70% minimum value for DDC output)
Communication	DDC output	Available	Available
Communication	P.D.(With heating function)	Communication of power source or C.C. communication of heat source	Communication of power source or C.C. communication of heat source
Communication	Proportional band(%)	From 100% (70% minimum value)	From 100% (70% minimum value)
Communication	Demand limit(%)	From 100% (70% minimum value)	From 100% (70% minimum value)
Communication	DDC output	Available	Available
Communication	Identify	C.1 to C.6 (C.1 ~ C.6)	C.1 to C.6 (C.1 ~ C.6)
Output	• Supply current	Up to 20mA AC / 2A (Minimum value) 20mA AC / 2A (Minimum value less than C.1)	Up to 20mA AC / 2A (Minimum value) 20mA AC / 2A (Minimum value less than C.1)
Output	• Non linear voltage	Up to 10V DC (Maximum 10V) (Non linear parameter)	Up to 10V DC (Maximum 10V) (Non linear parameter)
Output	• Output	Up to 20mA DC (Low resistance) ; Maximum 20mA	Up to 20mA DC (Low resistance) ; Maximum 20mA
Temperature alarm	Output alarm by heat operation	• No alarm • High limit alarm (Demand setting) : input single span or C.C. input single span (±1%) or input single span (±1%) • Low limit alarm (Demand setting) : input single span or C.C. input single span (±1%) • High / low limit alarm (Demand setting) : C.C. input single span or C.C. input single span (±1%) • High / low limit alarm (Demand setting) : C.C. input single span or C.C. input single span (±1%) • Reverse high alarm : input single minimum to input single maximum (±1%) • Reverse low alarm : input single minimum to input single maximum (±1%)	• No alarm • High limit alarm (Demand setting) : input single span or C.C. input single span (±1%) or input single span (±1%) • Low limit alarm (Demand setting) : input single span or C.C. input single span (±1%) or input single span (±1%) • High / low limit alarm (Demand setting) : C.C. input single span or C.C. input single span (±1%) or input single span (±1%) • Reverse high alarm : input single minimum to input single maximum (±1%) • Reverse low alarm : input single minimum to input single maximum (±1%)
Temperature alarm	Starting function	Available by heat operation	Available by heat operation
Temperature alarm	Starting function (Demand setting)	Available (Demand setting: 50~100%)	Available (Demand setting: 50~100%)
Temperature alarm	Starting accuracy	Within 1% of the value of 12V (±1%) without heating function	Within 1% of the value of 12V (±1%) without heating function
Temperature alarm	Alarm	ON / OFF Alarm	ON / OFF Alarm
Temperature alarm	Identify	C.1 to C.6 (C.1 ~ C.6)	C.1 to C.6 (C.1 ~ C.6)
Temperature alarm	Output	Open collector	Open collector
Temperature alarm	Output capacity	Up to 20mA C.1/A (maximum)	Up to 20mA C.1/A (maximum)
Temperature alarm	When manipulating alarm limit (maximum or minimum), the alarm will run in the case the previous value is lower than the current value. When the setting limit (alarm P.D.) is 100%, this function is not applied.	When manipulating alarm limit (maximum or minimum), the alarm will run in the case the previous value is lower than the current value. When the setting limit (alarm P.D.) is 100%, this function is not applied.	When manipulating alarm limit (maximum or minimum), the alarm will run in the case the previous value is lower than the current value. When the setting limit (alarm P.D.) is 100%, this function is not applied.
Temperature alarm	Starting range (Demand setting)	Up to 20mA	Up to 20mA
Temperature alarm	Starting range (Heat operation)	Up to 20mA	Up to 20mA
Supply voltage	• 100mA (DC) AC / DC / DC	Up to 20mA	Up to 20mA
Supply voltage	• 20mA AC	Up to 20mA	Up to 20mA
Power consumption	Approx. 0.01	Approx. 0.01	Approx. 0.01
Isolation resistance	10MΩ or greater at 200V DC	10MΩ or greater at 200V DC	10MΩ or greater at 200V DC
Isolation resistance	When output is common output or non-isolated analog output, insulation test between communication terminals and output terminals must run separately.	When output is common output or non-isolated analog output, insulation test between communication terminals and output terminals must run separately.	When output is common output or non-isolated analog output, insulation test between communication terminals and output terminals must run separately.
Electrostatic protection	• 10kV AC for (Input terminals input terminals and ground) • 10kV AC for (Input terminals input terminals and power terminals) • 10kV AC for (Input terminals power terminals and ground) • 10kV AC for (Input terminals output terminals and ground) • 10kV AC for (Input terminals output terminals and power terminals)	• 10kV AC for (Input terminals input terminals and ground) • 10kV AC for (Input terminals input terminals and power terminals) • 10kV AC for (Input terminals power terminals and ground) • 10kV AC for (Input terminals output terminals and ground) • 10kV AC for (Input terminals output terminals and power terminals)	• 10kV AC for (Input terminals input terminals and ground) • 10kV AC for (Input terminals input terminals and power terminals) • 10kV AC for (Input terminals power terminals and ground) • 10kV AC for (Input terminals output terminals and ground) • 10kV AC for (Input terminals output terminals and power terminals)
Antenna temperature Antenna humidity	C.1 to C.6 10m (100%) (Non tracking)	C.1 to C.6 10m (100%) (Non tracking)	C.1 to C.6 10m (100%) (Non tracking)
Outer cover	• Outer retaining plate (Outer Light gray)	• Outer retaining plate (Outer Light gray)	• Outer retaining plate (Outer Light gray)
Mounting method	Flange, Solder, mounting fixture, Flange mounting (10~10mm)	Flange, Solder, mounting fixture, Flange mounting (10~10mm)	Flange, Solder, mounting fixture, Flange mounting (10~10mm)
Starting system	• Ventilation system	• Ventilation system	• Ventilation system
Weight	Approx. 1.0kg	Approx. 1.0kg	Approx. 1.0kg
Advanced function	Power failure measurement, fault diagnosis, diagnosis and function compensation (only thermocouple), near current	Power failure measurement, fault diagnosis, diagnosis and function compensation (only thermocouple), near current	Power failure measurement, fault diagnosis, diagnosis and function compensation (only thermocouple), near current

## Options

Category	Option	Description
Serial communication [45]	Options from the external computer.	
Serial communication [45]	Communication terminal	Various setting status changes and the status reading of the ECO-100
Serial communication [45]	Code term	API
Serial communication [45]	Communication port	A port number of 2, which can be connected to computer
Serial communication [45]	Communication speed	9600bps (4800 / 9600 / 14400bps translatable by heat operation)
Serial communication [45]	Communication system	RS485 (daisy chain connection)
Serial communication [45]	Error detection	Parity check, frame error
Master-slave communication [-with RS-485/-with RS-232C] [46]	Switches the master-slave with ECO (master-slave function), and detects the master-slave.	Switches the master-slave with ECO (master-slave function), and detects the master-slave.
Master-slave communication [-with RS-485/-with RS-232C] [46]	Setting address	Within 1% of master-slave
Master-slave communication [-with RS-485/-with RS-232C] [46]	Comm. output	Open collector
Master-slave communication [-with RS-485/-with RS-232C] [46]	Comm. capacity	Up to 20mA C.1/A (maximum)
Master-slave communication [-with RS-485/-with RS-232C] [46]	Address setting	401 (For single address : 1 address)
Starting system [47]	Start setting value	Start setting value and it can be changed by external computer.
Starting system [47]	Start operation (start setting value)	Start operation (start setting value) and the start timing about 2
External power [48]	External power	External power connection terminal
External power [48]	External power connection terminal	The user can use this terminal, however by utilizing this optional option may switch the state of the connection while running the computer etc.
Outer cover [49]	Outer cover (Outer light gray, Dark gray)	Outer cover (Outer light gray, Dark gray)

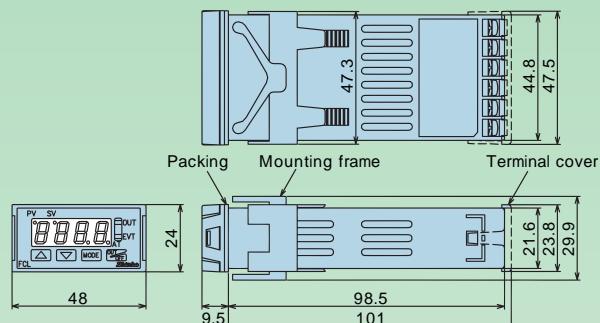

## Terminal arrangement

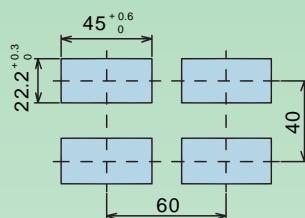

- R.: Relay contact output
- S.: Non-contact voltage output
- A.: Current output
- C5: Serial communication (RS-485)
- W: Heater burnout alarm
- SM: Setting value memory (External selection)
- Fan turnout: Temperature control, load break alarm or Heater burnout alarm

- Any of [Option C5], [Option W], and [Option SM] cannot be selected to FCL-13A type.
- For FCL-13A type, only one option out of [Option C5], [Option W] and [Option SM] can be selected.
- When does granting control output to current output type, [Option W] cannot be selected.

## Panel cutout

## Wiring example

### FCL-13A RVE

- SAFETY PRECAUTIONS**
- To ensure safe and correct use, thoroughly read and understand the manual before using this instrument.
  - This instrument is intended to be used for industrial machinery, machine tools and measuring equipment. Verify correct usage after consulting purpose of use with our agency or main office. (Never use this instrument for medical purposes with which human lives are involved.)
  - External protection devices such as protection equipment against excessive temperature rise, etc. must be installed, as malfunction of this product could result in serious damage to the system or injury to personnel. Also proper periodic maintenance is required.
  - This instrument must be used under the conditions and environment described in the manual. Shinko Technos Co., Ltd. does not accept liability for any injury, loss of life or damage occurring due to the instrument being used under conditions not otherwise stated in the manual.

### Caution with respect to Export Trade Control Ordinance

To avoid this instrument from being used as a component in, or as being utilized in the manufacture of weapons of mass destruction (i.e. military applications, military equipment, etc.), please investigate the end users and the final use of this instrument. In the case of resale, ensure that this instrument is not illegally exported.

- This catalog is as of July 2004. Specifications and external appearance are subject to change without prior notice.
- If you have any inquiries, please consult our agency or with us directly.
